

Heritage Christian College

Our Distinctiveness

HCC is a unique College. Our uniqueness originates in our Vision, Mission and Core Values but does not end there!

In support of the universities' deliberate plan to be the flagship Christian University in Africa, HCC will help deliver tangible differences.

A technology enabled campus

Every student, faculty member and administrator will be required to have a laptop, lifetime email, access to a secure electronic filing cabinet on campus and students will be taught how to create, maintain and use an electronic portfolio (e-portfolio). An e-portfolio is an enhanced Curriculum Vita (CV).

Results not talk! Begin with the end in mind –Learning and doing are lifelong pursuits. HCC graduates should adopt an attitude that embraces change and adaption. In the 21st century, this will be the world they live in.

HCC graduates will:

- creating a business or
- be employed by a business,
- employ many people and providing them jobs and
- giving back (philanthropy) to society and their church and
- taking care of their family, or
- develop a community development organization or
- work with a community development organization, or
- work with a church to nurture and develop people in their Christian discipleship.

HCC students will realize these dreams!

HCC will employ many tools and techniques not commonly seen in a university or college. They include:

- ***HCC Dream Competition*** –Prize winners will be encouraged to progress with the business or community idea and potentially will be invited to develop the idea in the HCC Incubator.
- ***HCC Incubator*** – The within which a startup business or organization (entity) can begin.
- ***HCC Campus Center Store(s)*** – HCC will have a campus center which will house stores that can sell products and services of need to students, faculty and the local community.
- ***HCC Investment Institute*** – will be establishing a portfolio to be used as an investment teaching tool. Students will nominate and agree on a

non-profit cause to which they will allocate a donation from the returns (ROI).

- **HCC Farming Institute** – will developing vertical business entities (i.e. businesses that take product from farm all the way to consumer). There are several candidates being studied and developed already.
- **HCC Technical Training Center** –The Technical Institute will run its own programs where necessary but will first look to others already doing training and work to nominate and bring students to the training.
- **Heritage Bible Institute** –HBI provides practicum experiences in ministry that will help Church of Christ Bible majors to complete their required training to be ministers in churches of Christ.
- **HCC Clinic** –HCC needs to be able to provide initial care when a student becomes ill. Essentially triage. Over time, the HCC Clinic will provide services to the community.
- **HCC Post-Graduate Education Center** –will provide ongoing training for its graduates.

Businesses, organizations, impact demonstrated

Demonstrate real tangible results, real impact!

Catalyst for change and growth

Change requires leadership. Change requires integrity. HCC will not rest or deviate from its Vision and Mission as long as it meets the needs of the people of Ghana and West Africa.

Graduates who share and server – real – philanthropy demonstrated

We are Christians. We will be encouraged to learn create and share with our churches, families and others. In so doing we will do all in a holistic ethic; an ethic that is shared across all roles. Christians treat each other and others they deal with in the same in all roles!

Lifelong learners

HCC will endeavor to provide continued training services and to work with graduates to offer training in their communities.
